

CYBER

Live Hacking: Inside the Hacker's Toolbox

Cyber attacks sound abstract until you watch one happen live on stage.

Cyber attacks often sound abstract until you see how they actually happen. In this engaging keynote, Menny Barzilay demonstrates real-world hacking techniques live on stage, giving audiences a rare look at how cyber attackers operate. Using the same tools and methods employed by criminals, the talk reveals how attackers exploit software vulnerabilities, manipulate human behavior, and turn everyday technologies into powerful attack vectors.

From phishing attacks and social engineering to surprising ways systems can be compromised, these live demonstrations expose the creativity and ingenuity behind modern cybercrime. Because once you see how hacking really works, one thing becomes clear: security is not just about technology – it's about understanding the attacker's mindset.

BEST FOR

Audiences of any background who want to see attacks happen, and security teams.

KEY TAKEAWAYS

- How real cyber attacks are executed step-by-step
- The tools and techniques used by modern hackers
- Why even small vulnerabilities can lead to major breaches
- Practical lessons organizations can apply to reduce cyber risk

AVAILABLE AS

Standard · Workshop

Standard talk: 15–60 minutes

Workshop: 3 hours to a full day

**ABOUT MENNY**

Menny Barzilay is an internationally recognized cybersecurity expert, entrepreneur, and strategic advisor. He is the CEO and co-founder of Atorian, a partner and co-founder at Cytactic, and the CTO of the Blavatnik Interdisciplinary Cyber Research Center at Tel Aviv University. Previously, he served as a CISO in the intelligence services of the Israeli Defense Forces.
